

It is essential that the government does not eliminate or relax in any way, shape, or form, the present Wisconsin no-call list. This service was so very needed when it was instituted. Unwanted phone calls were incessant and intruding in our homes, interrupting our lives constantly. Additionally, these nuisance calls to the public are especially problematic for the elderly community, causing the elderly to be financially and emotionally taken advantage of. Do NOT, under any circumstances, change this program, PLEASE!!!
